Workshop Entry & Revenue

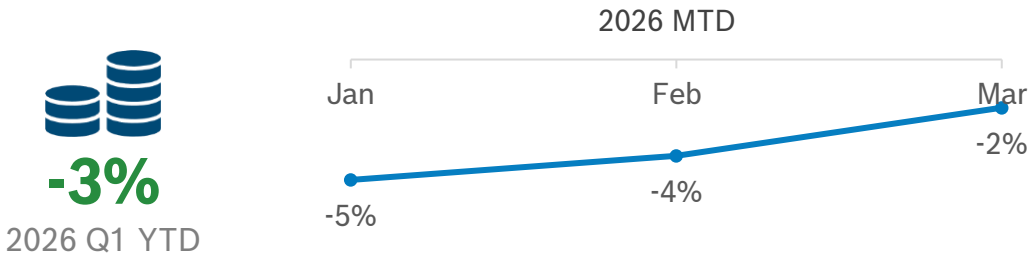

2026 Q1 China workshop entry & revenue both decreased 3% versus previous year. The "cautious wait-and-see" attitude on the consumer side, coupled with NEV impact, has both affected the current market performance. The YoY decline in service visits was narrower in lower-tier cities than in second-tier and above. Lower-tier cities are showing greater resilience and growth potential in aftermarket demand.

CN Aftermarket Workshop Entry & Revenue Performance

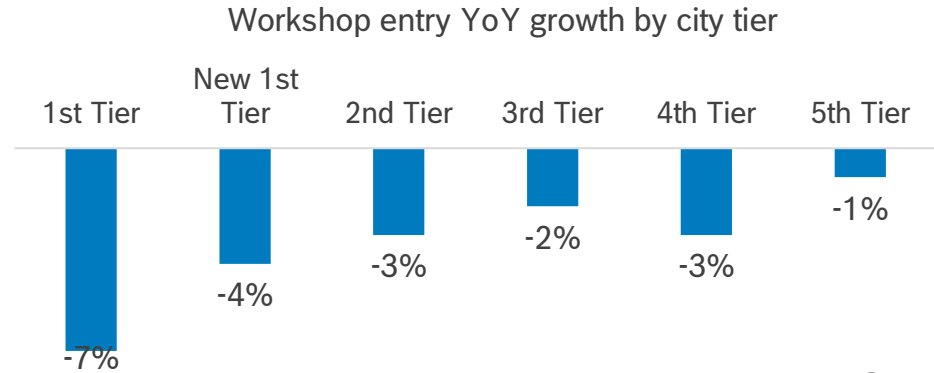

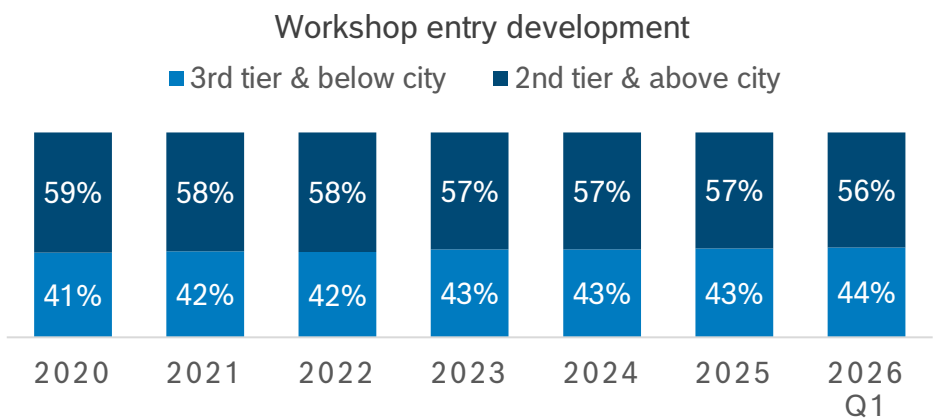

Workshop Entry YoY

Workshop Revenue YoY

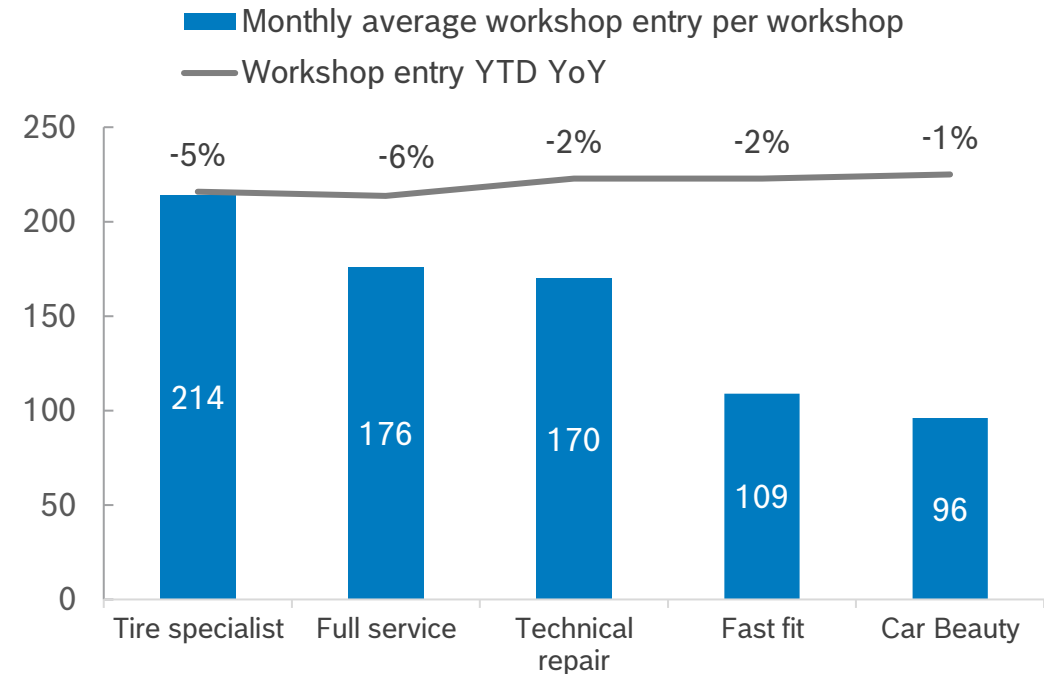

Workshop Entry by City Tier

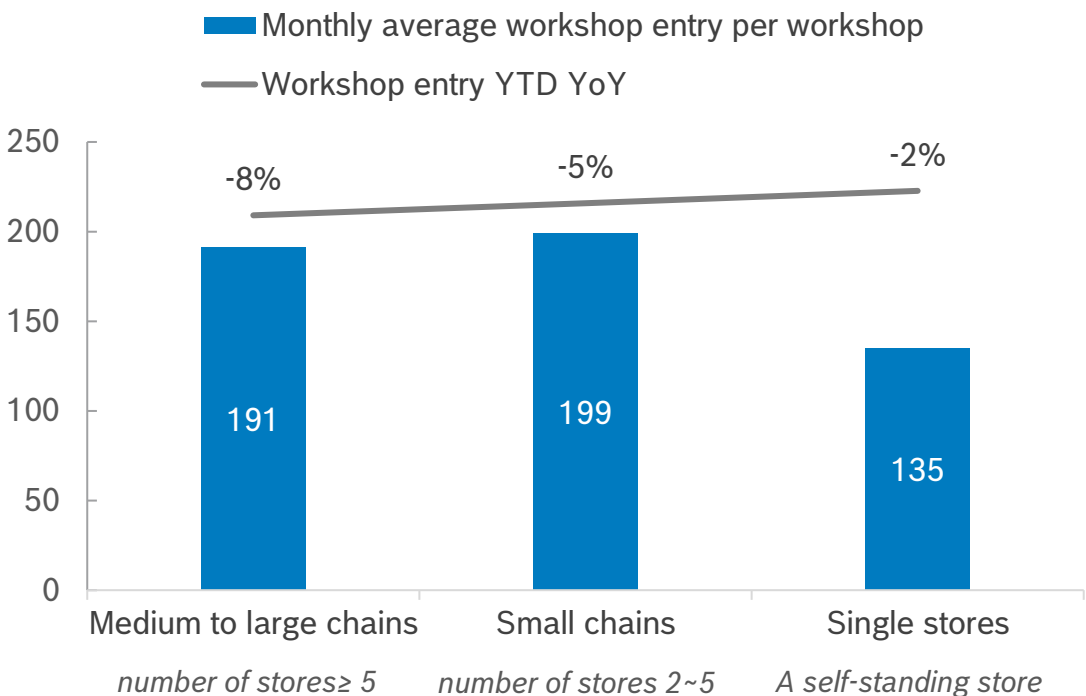

Workshop Entry by Workshop Category

In Q1, service visits to various types of workshops all showed YoY declines. Both tire specialist and full service saw decline rates exceeding 5%. YoY workshop entry to different chain store types showed a trend reversal. Medium and large-sized chain stores saw a decline of 8%, significantly higher than small chains and single stores. The scale expansion of large chains has led to a dispersion of traffic, along with the emergence of community-based workshops with good reputation in lower-tier markets and their price advantages could be underlying causes.

CN Workshop Entry by Workshop Type

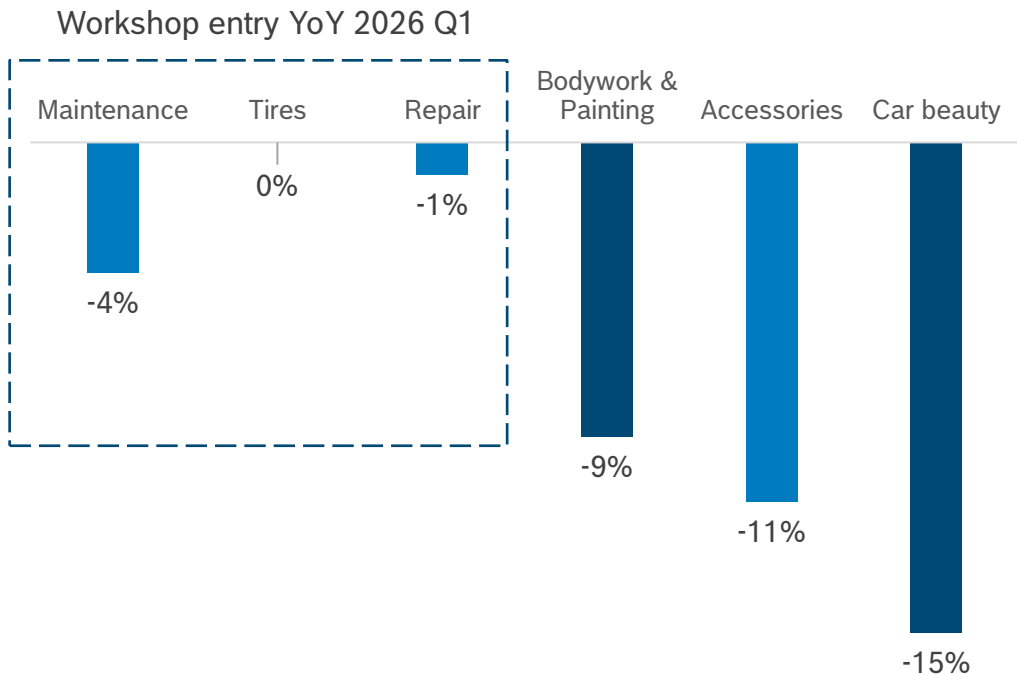

CN Workshop Entry by Workshop Scale

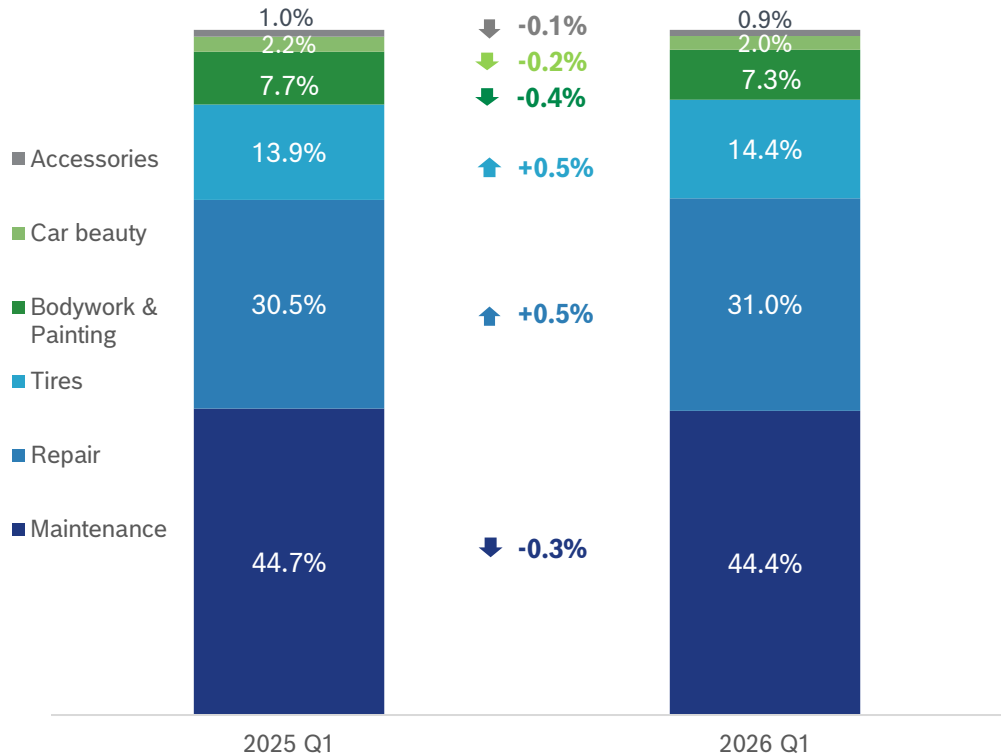

Workshop Entry by Service Type

From a service type perspective, car beauty & accessories were the most impacted due to car drivers' low willingness to spend. The YoY decline rates in service visits were relatively mild for maintenance, repair and tire services, they account for 89.8% of service visits in the aftermarket, remains the core business of workshop.

Workshop Entry Share by Service Type

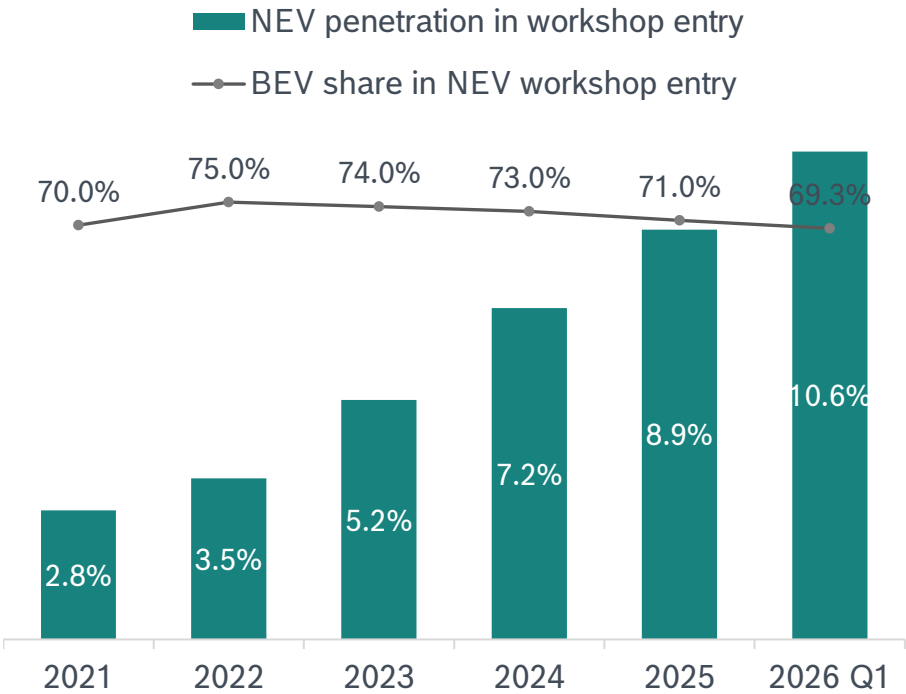

NEV Penetration in Vehicle Sales & Aftermarket

NEV penetration in new vehicle sales in Q1 pulled back (from 52% in 2025 to 46% in 2026 Q1) mainly due to the reduction of government subsidy. However, the demand for NEV services in IAM is still in an acceleration phase. The share of NEVs workshop entry in IAM reached 10.6%, among which BEVs represent 69.3% and PHEVs account for 21.9%.

PC sales source: CPCA PC wholesale data incl. export

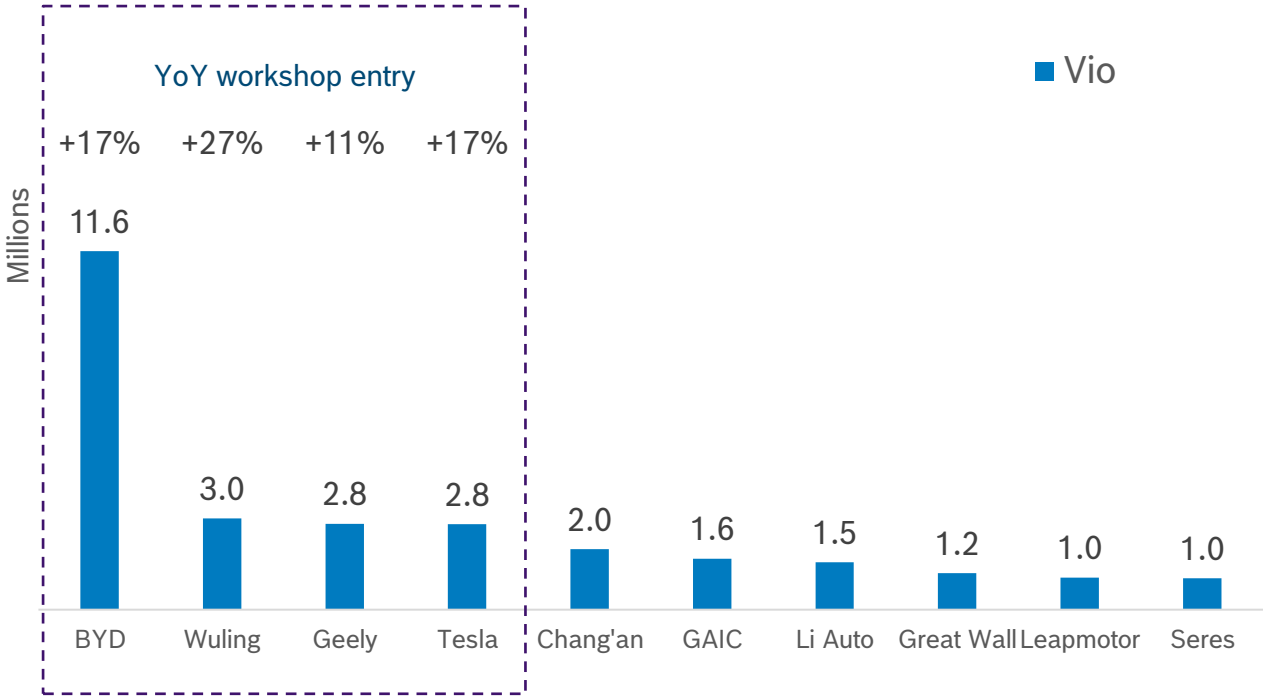

NEV Workshop Entry by Fuel Type & Top OEM

YoY workshop entry of NEV increased 20% while that of ICE decreased 5%, PHEV has the highest growth rate of 29%. As for top NEV OEMs, BYD, SGM Wuling, Geely, Tesla represent half of total NEV VIO, IAM workshops are receiving growing workshop visits of their vehicle models.

Product Market Sales

In Q1 2026, categories such as battery, control arm/shock absorber in suspension system had a growth in sales volume, driven by long-distance travel surged during this year's Spring Festival holiday. In contrast, regular maintenance such as lub & filter continued to face pressure. Since 2023, the market shares of domestic brands for engine oil and battery maintain a continuous growth trend. The temporary pullback of domestic brands of battery in Q1 follows a seasonal pattern at the beginning of each year.

YoY Market Sales Growth by Product

Share of Domestic Brands

Product Market Sales by City Tier

In Q1, sales of engine oil, oil filter, fuel filter, brake disc, and spark plug faced YoY declines across all city tiers.
In contrast, battery, tier, water pump achieved growth in every tier, together with chassis parts, serving as the core growth engines in Q1.

Category	Product line	First-tier	New first-tier	Second-tier	Third-tier	Fourth-tier	Fifth-tier
